Dear [Name of Employee],

Citrus College has partnered with the USC Race and Equity Center, and I am inviting employees to participate in the *National Assessment of Collegiate Campus Climates (NACCC) Employee Survey*, an assessment of campus racial climates. Your participation is vital to helping the College identify areas of success and where we need to improve as we take action against structural racism.

Simply click your unique survey link below to participate, or copy/paste the link to any web browser:

If you are unable to access the survey by clicking the unique link above, try copying and pasting the link into the URL bar of your web browser. **This is a unique link assigned to you.** It is important that you do not share or forward this email to anyone else. Participation in the survey is voluntary. **Responses are your own and they are confidential.** They cannot be substituted with those of anyone else. Please email naccsrv@usc.edu if you require a survey link that is accessible for screen-reading assistive tools.

The survey will be live from May 2 – 30, 2023 and take approximately 15 minutes to complete. Completed surveys will be sent directly to the NACCC, not Citrus College.

Why you matter and what your role is in all of this: Your shared perception of your personal equity-related experiences in the workplace are invaluable. All Citrus College employees have the capacity of accepting ownership, at any level, for positive change. All are encouraged to adopt a meaningful mindset of creating an environment where students, colleagues and those visiting our beautiful campus feel safe, welcome and included. Please consider becoming an advocate for change where change is needed.

I understand the deep sensitivity of the topic of race and equity. To help create a sense of ease, I invite you to learn more about the survey by visiting the [USC Race and Equity Center website](#). From the homepage, scroll down to *Campus Climate Surveys* and click the *NACCC Staff Survey* tab.

Sincerely,

Greg Schulz, Ed.D.
