

Asher was adopted in May 2020 when he was 2 months old. He was just what this family needed during the tough times of Quarantine 2020. He has two personalities; one is super sweet and cuddly and the other is a playful attack mode. Asher loves to play with and sleep on bags (shopping bags, beach bags, backpacks, etc). He also loves to play outside, where he climbs trees and chases birds. His favorite thing to do at night is hunt crickets in the garage. When he catches one, he brings it into the kitchen to make sure his family sees what a great hunter he is. His favorite toy is a small pink slinky that he always wants to play fetch with. He has ripped up chairs, window screens and curtains, but that's okay because he has also brought constant entertainment, eased stress through his calming purrs and affection, and added fun to the monotony of staying at home! He is been a perfect addition to the family!

Asher belongs to Monika Frausto, Instructional Lab Tech III, Chemistry
