Admission to dental school is highly competitive. Generally speaking, a degree in dentistry requires four academic years of study. The first two years usually cover the basic sciences and the last two years, diagnosing oral disease, surgery, and clinical study. At the completion of the curriculum, students are awarded either a DMD (Doctor of Dental Medicine) or DDS (Doctor of Dental Surgery) degree.

**Note:** All courses should be taken for a letter grade, not Credit/No Credit.

**Choosing an Undergraduate Major**

“Pre-dental” is not a major at universities. You should give careful consideration to your choice of major and select an area of study that interests you. Most dental schools do not require a specific degree in order to apply. Instead, they are looking for a well-rounded applicant who does well in the dental school admissions requirements. Students should select an appropriate major that could lead to an alternative career, if necessary. The majority of entering dental students have a bachelor’s degree. However, students that have completed their junior year could be accepted.

Students applying to dental school need to plan carefully and complete not only the dental school admissions requirements, but also the requirements for their undergraduate major and the general education required by the undergraduate transfer institution.

**Dental School Selection Criteria**

- Completion of the prerequisite coursework.
- Bachelor’s Degree or 3 or more years of undergraduate coursework.
- GPA in terms of overall college grades and science grades are a major factor in the selection process. For most dental schools, the average "competitive" applicant has a cumulative grade point average of above a 3.4.
- Score on the Dental Admissions Test (DAT). This computerized test measures general academic ability, comprehension of scientific information and perceptual ability.
- Community service/leadership
- Letters of recommendation from science faculty, non-science faculty, and a supervisor from relevant clinical experience, research, or relevant work.
- Interviews with faculty from the institutions you apply to.
