

The Credential Validation animation, provided and powered by CeCredential Trust, shows the page visitor how to use the Credential Validation interface verifying student credentials.

The Citrus College student will enter an assigned 12-digit Certified Electronic Document Identifier (referred to as CeDiD), which uses non-case sensitive letters and numerals, into the designated field on the Credential Validation interface.

The student will click on the “Validate” button to process the request.

Below the “Validate” button, a two-column table will appear noting the following:

- if a valid credential;
- the date validated;
- CeDiD key;
- student name;
- conferral date;
- credential name (e.g., Associate of Arts in Music or Certificate in Criminal Justice)
