

# Did you know?

**"The more actively engaged students are – with college faculty and staff, with other students, with the subject matter they are studying – the more likely they are to persist in their college studies and to achieve at higher levels."**

*Community College Center for Student Engagement*

As revealed in the 2022 Community College Survey of Student Engagement (CCSSE), one of the greatest opportunities ahead for our campus is to increase engagement in the following areas:

**43%** prepare two or more drafts of a paper or assignment before turning it in

**48%** writing at least five reports or papers during the academic year

**54%** meeting with an academic counselor/advisor at least two times during the academic year

**67%** course exams greatly challenged them to do their best work

**Please note:** All of the above survey items had a higher national average according to the CCSSE 2022 Executive Summary.

**Question for your reflection:**  
How does your academic engagement measure up considering these four points?
