TECH TIP #3: EMBEDDING VIDEOS IN YOUR COURSE

Videos provide an engaging way to present material and content to students. There are various ways to embed video in your Canvas class to increase ease of access for your students.

External Tools

**1** Using the editing tools on any page, quiz, or assignment, select the option for "External Tools."

The External Tools icon looks like a "v" and will open a drop down menu.

Is college worth it?

Please watch the following video as part of our course orientation:

1a The drop down menu allows you to search YouTube or Films on Demand

- Google Apps
- Microsoft Office 365
- YouTube
- Films On Demand
- Commons Favorites
- Gale Virtual Reference Library
- SoftChalk Link Selector

Find your video, and select "Embed."

Record/Upload Media

2 Using the editing tools on any page, quiz, or assignment, select the option for "Record/Upload Media.".

The Record/Upload Media icon looks a "play button."

Record/Upload Media

2a The pop-out allows you to record directly to the page or to upload your Mp4 or Mp.3 file.

Record/Upload Media Comment

Record Media | Upload Media

Select Audio File | Select Video File
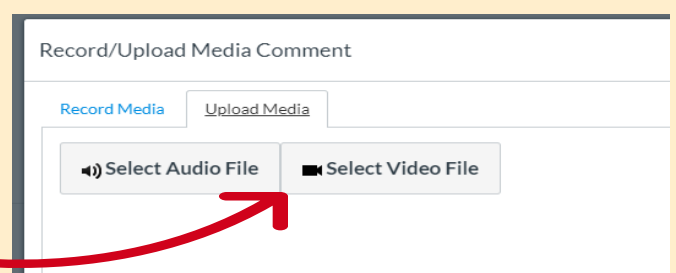

Embed links or HTML

3 Using the editing tools, you can insert a link to the desired URL address.

Link to URL

Please watch the following video
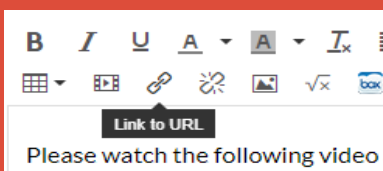

3a Switch into HTML to copy an embed code into your page. Click "Save."

HTML Editor
