

Dave Kary - Astronomy Featured Faculty December 2018

HOMETOWN: New Westminster, BC, Canada
B.Sc. University of British Columbia
Ph.D. State University of New York, Stony Brook

I maintain a YouTube channel of astronomy-related music called Dave's Astrotracks

I like to travel, take long walks, and visit all of the nice restaurants around Claremont (hence the need for the long walks).

I've visited 9 of 10 Canadian provinces and 40 US states.

I've been interested in astronomy since grade 3. I always assumed somebody would tell me to stop playing around with that stuff and get a real job but it hasn't happened yet!

I'm married to an astronomy teacher (at Chaffey College) and my daughter is in college studying to be an aerospace engineer.

FAVORITES

WORD	Celestial mechanics
